Student vSRX Interface Topology

The vSRX used in the lab has three physical interfaces in the topology.

- ge-0/0/0.0
 - This interface is used by Vagrant to talk to the device
 - When using commands such as "vagrant ssh" this is the Interface it connects to
 - The interface is configured in a management zone and is not for transit
 - Uses DHCP for IP address allocation
- ge-0/<u>0/1.0</u>
 - Connected to the NetDevOps VM
 - Has a static IP address of 172.16.0.1/24
 - When needed to connect to the vSRX from the NetDevOps VM this is the interface and IP to use
- ge-0/0/2.0
 - This interface connects to the headend vSRX
 - Has a static IP address of 10.10.0.10/22
